SOLIDAGO JUNCEA	EARLY GOLDENROD	NI

PRICE PER LB. \$66.00
 REQ. QUANTITY: 1 LBS.
TOTAL \$66.00

APPLY: 23 LBS/ACRE
 MINIMUM QUANTITY: 1 LBS

The New England Wildflower Mix includes a selection of native wildflowers and grasses that will mature into a grass and forb native meadow. It is an appropriate seed mix for roadsides, commercial landscaping, parks, golf courses, industrial sites and ecologically sensitive areas.. Always apply on clean bare soil. The mix may be applied by mechanical spreader, or on small sites it can be spread by hand.

Lightly rake, or roll to ensure proper seed to soil contact. Best results are obtained with a Spring or late Fall dormant seeding. Late Spring and Summer seeding will benefit with a light mulching of weed-free straw to conserve moisture. If conditions are drier than usual, watering may be required. Late Fall and Winter dormant seeding require an increase in the seeding rate. Fertilization is not required unless the soils are particularly infertile. Preparation of a clean weed free soil surface is necessary for optimal results.

New England Wetland Plants, Inc. may modify seed mixes at any time depending upon seed availability. The design criteria and ecological function of the mix will remain unchanged.

Price is \$/bulk pound. FOB warehouse, plus S&H and applicable taxes
